REACH compliance statement

Background of REACH

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) was first released. The regulation came into force on 1st June 2007 and established European Chemical Agency (ECHA) which manages the Technical & Scientific aspects of REACH. This Regulation establishes specific duties and obligations for companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles.

Consideration of REACH

REACH adopted to addresses the production and use of chemical substances and their potential impacts on both Human Health and the Environment and to improve the same from the risks that can be posed by chemicals. REACH also promotes alternative methods for the assessment of hazardous substances in order to reduce the number of tests on animals.

Amendment Commission Regulation (EU) 2015/830 dated 28 May 2015 amending Regulation (EC) 1907/2006 of the European Parliament and of the Council on REACH and released a list of Substances of Very High Concern (SVHC), 181 substances as per latest SVHC Candidate list, updated on 16 Jan 2018. REACH SVHC list is not a static list and it is updated once in six months, ECHA now added 4 new substances in the list of candidates to the previous list (published on 15 Jan 2019). Thus, the current list now contains 201 substances as on 16 July 2019. Further more this list is a living document for the latest revision please use this link [European Chemicals Agency](#)

Declaration

Tasman Industries Ltd is constantly monitoring product exposure where there may be substances of very high concern (SVHC), Tasman Industries Ltd products (articles) do not contain Substances of Very High Concern above the threshold value declared by ECHA mentioned in Candidate List (201 substances as per latest SVHC Candidate List, updated on 16 July 2019)

Statement of intent

It is Tasman Industries Ltd intent to:-

- Identify all non-complying product and continue to work with our supply chain to ensure product / material conformance at all times.
- Work with our global supply chain in order to minimize & manage and identify any potential risks associated SVHC materials
- Communicate sufficient information to relevant customer's in order to provide information on identified uses within the meaning of REACH
- Follow HSE guidelines / Safety Data Sheets and providing information on exposure scenario
- Providing our customer with information regarding hazards, risks & safe conditions of use of our products through material Safety Data Sheets
- Continuously monitor and advise non-complying materials that are listed in accordance to the ECHA latest candidate list.
